

Installation

GEWISS

70 RT HP
Energy and safety.
Everytime and everywhere.

ENERGY AND SAFETY. EVERYTIME AND EVERYWHERE.

70 RT HP

70 RT HP is a complete offer of **rotary isolator switches** from 16A to 160A, available in **boxes both in insulating material and metal**, in control or emergency versions, compatible with the main applications for residential, tertiary and industrial contexts. DC versions for photovoltaic applications are also available from 16A to 40A in insulating box. The series is completed with **versions for board** from 16A to 800A and for **DIN rail fixing** from 16A to 63A, which can be equipped with auxiliary contacts. The devices have been designed to **reduce wiring time**, facilitate installation and **guarantee the maximum safety and robustness** even in the most demanding conditions.

Applications:

- Air conditioning system
- Lifts
- Photovoltaic applications
- Ventilation and vacuum system
- Technical rooms
- Industrial kitchens

PERFORMANCE

The switches of the 70 RT HP Series grant high performances thanks to the use of materials with a protection degree of IP66/IP67/IP69 and the optimization of wiring and installation times.

RELIABILITY

The heart of the offer is represented by the rotary switch disconnecter, which grants a complete reliability in insulating an electrical line/network. Designed to provide high electrical performances, the switch can operate with highly inductive motors (AC23A utilization category).

SAFETY

The knobs of the 70 RT HP Series have been designed to resist even strong mechanical stresses. The innovative padlocking system, concealed within the switches, can only be operated using a tool, with space for up to 3 padlocks which can be locked in both ON and OFF positions (in the emergency version the switch can only be locked in the OFF position).

VERSATILITY

As well as surface-mounted versions, 70 RT HP is also available in a version for distribution boards: either front-panel installation or DIN rail assembly (EN50022). In this way, the products of the range are extremely flexible, as they can also be installed in all GEWISS distribution boards.

Versions in insulating box

TOTAL PROTECTION

The rotary isolators in plastic boxes have a protection degrees up to IP66/IP67/IP69, which guarantee a total protection of the products against dust and liquids, even in the case of high pressure and high temperature water jets. For this reason, 70 RT HP isolators are particularly suitable even in the most demanding environments.

QUICK ASSEMBLY

The front part of the 16-80A versions up to 4P is fixed with just 4 captive and lead sealable screws with a ¼ turn: a simple and innovative system which allows the front to be fixed or removed in a considerably reduced time, compared to any other system available on the market.

EASY INSTALLATION

There are many technical features to make the installation and the wiring easier: double metric entries (on the upper and lower sides), external points for wall fixing and a large internal space for routing the cables.

Versions in metal box

ROBUST AND RELIABLE

The metal box versions with protection up to IP66 are made in painted aluminium alloy, which offers high levels of performance over time, even in the most critical and heavy-duty conditions.

READY FOR USE

The metal box is pre-equipped with 4 external brackets for surface-mounting, maintaining the original IP rating even after installation. The bottom of the versions up to 80A is also supplied already drilled, ready to accept metric-pitch cable glands.

ATEX VERSIONS

The range is completed with the ATEX versions from 16A to 100A, compliant with Directive 2014/34/UE (which defines and regulates electrical systems in environments with potentially explosive atmospheres). The products of the range are available for 22D zones and complete the offer of GEWISS branded ATEX devices, which also includes control devices, junction boxes and lighting equipment.

DC versions for photovoltaic applications

HIGH PERFORMANCE

The direct current isolators of the 70 RT HP Series are available from 16A to 40A in a plastic box. They guarantee a high breaking capacity up to 1.000 VDC while maintaining the rated operational current. Compliant with EN 60947-3 and CEI EN 60947-3:2021 (Annex D) standards for photovoltaic applications.

TOTAL PROTECTION

The isolators for photovoltaic applications are equipped of a plastic box with an IP66/IP67/IP69 degrees of protection, which guarantees total protection against dust and liquids, even in the case of high pressure and high temperatures water jets.

EXAMPLE OF PV APPLICATION

Versions for board

COMPLETE RANGE

The isolator switches for boards guarantee robustness and reliability in controlling and disconnecting circuits up to 800A. The offer is completed with the versions for DIN rail fixing from 16A to 63A.

HIGH PERFORMANCE

The versions from 200A to 800A offer a high disconnection capacity maintaining the rated current up to 500V. Thanks to the transparent window on each poles, it is clearly visible if the switch is open or closed, even from a distance.

ACCESSORIABILITY

The handles feature an integrated padlockable locking mechanism. The range is also equipped with auxiliary contacts suitable for every need. It is also possible to customize the adjustment range by cutting the supplied shaft.

NOTE: can be padlocked in ON and OFF position with max. 3 locks with diameter max. 8 mm.
The 63-100A 6P-8P versions can be padlocked only in the OFF position with IP66/IP69 protection degree.
Versions 100-160A up to 4P and 63-100A 6P and 8P allow to install max. 2 x M63 cable glands.
All lid screws are sealable.

GW 70 459	3P	30	215x252x94	1
GW 70 460	4P	30	215x252x94	1

ACCESSORIES SUPPLIED: cable gland M25 for 16A versions, M32 for 32-63A versions, and M40 for 100A.

CHARACTERISTICS: box in aluminium alloy painted in Grey RAL 7037.

ATEX Classification: Equipment-group II Category 3D.

Dust protection mode: tc.

Room temperature: -20°C ≤ Ta ≤ +40 °C.

NOTES: Can be padlocked with 3 locks in the OFF position and one in the ON position.

EMERGENCY VERSIONS IN ALUMINIUM ALLOY BOX

GW 70 471

ATEX ROTARY WALL-MOUNTING SWITCHES FOR EMERGENCY, WITH RED KNOB - IP65

Code	No. of poles	Power AC3 400V (kW)	Outer dim. LxHxD (mm)	Pack Carton

NOTE: for versions from 200 ÷ 800A for applications with voltages ≥500V the phase barriers are required.

Wiring diagram

Auxiliary Contacts 16 A ÷ 160 A

TECHNICAL DATA	
Type: Auxiliary Contacts NO or NC	Thermal current in Air (Ith): 16 A
Rated insulation voltage (Ui): 400 V	Thermal current in Boxes (Ithe): 10A
Conditional short circuit current (Icc - 400 V): 1 kA	Rated impulse withstand voltage (Uimp): 4 kV
Associated fuse size for conditional short circuit current - Type gG: 6A	Category of use AC15: 6A (230V)
Tightening torque: 0,8 Nm	3A (380V)

Auxiliary Contacts 200 A ÷ 800 A

TECHNICAL DATA	
Type: Auxiliary Contacts EB or NC	Thermal current in Air (Ith): 16 A
Rated insulation voltage (Ui): 690 V	Rated impulse withstand voltage (Uimp): 6 kV
Conditional short circuit current (Icc - 690 V): 1 kA	Category of use AC15: 6A (230V)
Associated fuse size for conditional short circuit current - Type gG: 10A	3A (380V)

70 RT ATEX DISCONNECTORS - METAL BOX

Switch disconnectors for command and emergency in aluminium box painted in Grey Ral 7037, suitable for use in **ZONE 22(D)** with rated current of 16-32-63-100A. Standard: EN 60947-3, EN 61241-0, EN60079-0, EN60079-31 - Dir. ATEX 94/9/CE.

TECHNICAL DATA					16A	32A	63A	100A
