

Smart [PRO] 2.0 is a new and improved lighting range with added intelligence. The range of LED floodlights for sports facilities and large areas has been increased with a new highpower 3X2M version offering even **better performance, increased energy efficiency** and **improved lighting quality**. In addition, the new range can talk to interactive products to create intelligent systems, for more conscious and efficient management.

The exclusive advantages of **Smart [PRO] 2.0**

Modularity

The Smart [PRO] 2.0 family is designed to offer highly modular optical groups, providing exceptional flexibility throughout the range, and offering the right solution for any type of application.

Connectivity

The new Smart [PRO] 2.0 floodlights have been designed to communicate with INTERACTIVE systems, adding intelligence to lighting systems to monitor power consumption, light management, parking detection and much more.

Flexibility

Smart [PRO] 2.0 is completely adaptable to each project, with totally flexible parameters such as: Colour Temperature, Colour Rendering, type of power supply, type of optics and can communicate with INTERACTIVE intelligent systems. For exceptional flexibility and customisation.

Efficiency

The optical and LED systems of the new Smart [PRO] 2.0 have been enhanced to offer even greater efficiency and higher light levels, maintaining the quality of light. The result is a highly efficient and powerful system, meeting the most exacting lighting requirements, without compromise.

Dimensions

DIGITAL SPORT INNOVATION

GEWISS has introduced **DIGITAL SPORT INNOVATION** to bring safety, lighting quality and energy savings to Italian sport. Discover all the details and the projects created at www.digitalsportinnovation.com

Supply	1-10V DALI	1-10V DALI	1-10V DALI* DMX*	DALI* DMX*

* New

Technical features

- Colour temperature: 3000K / 4000K / 5700K
- Operating temperature (Ta): -30°C a +50°C
- Lifetime:
 - L90B10 (Tq+25°C) > 50.000h
 - L80B10 (Tq+25°C) > 110.000h
- Overvoltage protection: 10KV
- Efficiency: until 126 lm/W
