Sustainability Project:

The future of tomorrow

We have chosen to develop a **responsible business model** which fosters behaviours which **respect both people and the environment**, implementing our **Sustainability Project**.

In line with the 3 fundamental pillars of sustainability (Society, Environment and Economy) we have identified our own pillars: **Strategic Approach, Business, Governance, Social, Environment, People**. For each of them, we have defined a set of priorities that we aim to achieve to create value for our company and along the entire value chain.

An important goal already reached is the achievement, at the end of 2020, of the **ISO 50001** certification, which validates our **efficient management of resources** and the positive consequences in terms of **energy saving** and **environmental sustainability**.

“ The approach to **sustainability taken by GEWISS** envisages **strong cohesion and synergy with the Company Mission**. GEWISS' goal through its day to-day activities is to **create shared value for all stakeholders**, along the entire **value chain**, in all the territories in which it operates, **pursuing sustainable development** and promoting innovations that **substantially improve daily life**. ”

We generate social and economic value for the company and for our representatives through **services and solutions that improve daily life**, reduce costs and respect the environment. This philosophy acts as a constant guide in the solutions we provide.

Our range has shifted **from products that present solutions to those that provide a service**, with five lines to cover every need: **Lighting, E-Mobility, Energy, Installation and Building**.

ENCLOSURES FOR EMERGENCY SYSTEMS

The GW42201 emergency-system enclosure is the ideal product for handling emergency systems. It can be fitted with up to four NO and NC contacts, and it also offers the possibility of signalling emergency circuit integrity, thanks to the green LED.

FUNCTIONALITY AND FLEXIBILITY IN A SINGLE ITEM

The GW42201 enclosure can be fitted with a short or long push button for voluntary movement or intrinsically safe operation, and has a back panel flange that expands the number of contacts installable up to four, thus increasing the configurable solutions.

MAXIMUM SECURITY

All the enclosures have a high IP55 protection rating and thanks to the emergency hammer (available as accessory), breakable panel and halogen-free materials, they are suitable for use even in areas open to the public.

VERSIONS WITH QUICK-ENTRY CABLE GLANDS

The boxes with cable glands enable quick insertion of rigid and flexible cables. The innovative geometric shape guarantees high-levels of mechanical performance and ensures that IP rating of the box is maintained even with cables or conduits inserted, thanks to the special suction effect.

LARGE CAPACITY BOXES

The boxes with high-capacity bottoms have been studied in every detail for practicality and robustness, even for the connection of larger diameter conduits (up to 50 mm). This attention to detail has produced a range of boxes that are ideal in systems with a high-density of connections.

HINGED LID VERSIONS

All GEWISS junction boxes 190x140 mm and larger in size have plastic screws with a spherical head allowing the lid to open like a small distribution board (GEWISS patent). This innovative system also allows the covers to be sealed.

Multifunctional supporting bases

A range of boards for universal applications, as for example the support of electronic devices, power supply units or for the creation of small control boards with indicators and push-buttons. The cover with honeycomb finish offers the possibility of direct screw mounting of exposed equipment. Completing the offer is the watertight floor version outlet box ideal for example for the fixing of surface or recessed sockets-outlets.

VERSATILE AND SAFE FIXING

The fixing tabs on the enclosures allow fixing on plasterboard metal struts or panels. The clamps on the wiring devices boxes allow installation on plasterboard panels. The fixing holes allow surface mounting in the case of renovation.

SIMPLE AND INNOVATIVE

The 24 SC Green Wall range has been completely renewed: the special geometry of the knock-out holes enables convenient insertion of the conduit, which is held firmly in place. The "L" profile allows the conduit to be rotated vertically within its fitting.

HIGH QUALITY MATERIALS

Constant research in the field of plastic materials has enabled the use of materials with high mechanical strength, that are halogen-free, and that pass the GWT 850°C Glow Wire Test, in accordance with the specific product standard and the CEI [Comitato Elettrotecnico Italiano] 64/8 system standard.

FOR EVERY INSTALLATION NEED

The GEWISS rigid conduit range includes the RK9 (classification 22211), RK9 HF (classification 23431), RK15 (classification 3321), RKB (classification 4321) and RKHF (classification 4422), available in 7 sizes from 16 to 63 mm, and specific routing components for the creation of watertight or protected surface-mounted systems.

SIMPLE AND RELIABLE SYSTEM

The MORBIDX quick connect system allows the creation of surface mounted systems with IP65 and IP67 ratings, and a significant reduction in installation time. The perfect fit of the O-ring seal material ensures a firm conduit seal even in vertical position or if the conduit is not cut perfectly to size.

HALOGEN-FREE RANGE

RK9 HF, RKHF and a wide range of HF routing components enable the installation of Halogen Free surface-mounting systems, ideal for installations in public environments with high concentrations of people, thanks to lower toxic emissions and less smoke opacity in the event of fire.

Pliable protective conduit systems

System of protective corrugated conduits for concealed installation, available in two materials: PVC and Polypropylene (PP) and in different colours for easy identification of the lines according to normative recommendations. The pallets are protected with white stretch film to prevent exposure of the coils to UV rays and ensure at the same time a greater resistance to weathering and improved preservation during external storage.

FK-XTREME COEXTRUDED MEDIUM CONDUIT

The FK-Xtreme conduits, thanks to their special double-walled design, ensure total protection from the penetration of liquid cement components. The outer coating offers additional resistance during construction work against trampling, crushing and impact, even at low temperatures (down to -25°C).

FK15 ARCOBALENO MEDIUM CONDUIT

Available in versions with or without cable puller and in six different colourways for all ordinary construction installations. A ringed profile gives the conduits better flexibility, higher load resistance and reduced thermal memory.

ICTA SELF-RECOVERING MEDIUM CONDUIT

Those with classification 34223 have high resistance to impact and a wide range of operating temperatures. Made of LSZH (Low Smoke Zero Halogen) material, they are ideal in public environments (e.g. theatres, schools, etc.). Also available in version with cable pullers.

DF

Flexible protective conduit systems

The DF range of flexible protective conduits and accessories provide protection for the wiring of moving mechanical parts, as well as the interface between rigid conduits, junction boxes and distribution boards for the completion of exposed systems in tertiary and industrial sectors. Available in two mechanical strength levels, two colours and 14 diameters from 8 to 60 mm.

PROFESSIONAL SPIRALLED SHEATHS

The range of spiralled sheaths with classification 2311 is available in 14 different diameters in grey and black. They are also available in the Light version, with classification 1311 (in 12, 16, 20 and 25 mm diameters), ideal for use in air conditioning equipment.

FLEXIBILITY AND DURABILITY

The particular shape of the sheath, which has a rigid PVC inner coil and plasticised PVC outer coating, provides high resistance to crushing and ensures the flexibility necessary for every type of application and routing.

COUPLING DEVICES FOR EASY INSTALLATION

Once in place, the sheath can rotate freely, while maintaining IP54 rated protection, thanks to the straight swivel couplings. This facilitates the movement of sheaths already connected to boxes and distribution boards.

Access chambers systems

The range of PZ access chambers, available in 5 sizes, is ideal for junctions and manholes in electrical and telecommunication systems. These are provided with knockouts for cable ducts and knockouts base for stacking installation. Thanks to the thermoplastic material, knockouts for cable ducts and knockouts base for stacking installation, the PZ range is an efficient alternative to the access chambers made of concrete.

WIDE AND FUNCTIONAL RANGE

A broad offering that includes square and rectangular access chambers and related technical components. The rectangular access chamber offers the option of a double junction on the long side, and of installing seven separators longitudinally, transversely or diagonally.

KNOCKOUTS AND STAKING OPTIONS

The sides of the access chamber have knock-outs of different diameters for cable ducts entry. The removable base allows the PZ access chambers be layered, creating a modular system to increase access chamber depth and capacity.

HIGH-STRENGTH LIDS

The high-resistance PZ access chamber covers can be secured with 4 stainless steel self-threading screws for added safety and stability during installation. Only one tool is required to open the access chamber.

Accessories for electrical installation

Complete system comprising cable glands, plastic and metal fixings, couplings for rigid conduits and sheaths, cable ties for external and junction and connection terminal blocks. The depth of the range and breadth of the offers of each family makes GEWISS the specialist and ideal partner when implementing any type of system, from residential to commercial and industrial sector.

The 90 MCB range meets any requirement for protection against overcurrent and short-circuit, for all domestic, commercial and industrial applications. The range consists of MTC (compact miniature circuit breakers) and MT (traditional miniature circuit breakers).

CIRCUIT BREAKERS FOR RES. CURR. PROTECTION

The RCD 90 range is ideal for ground fault protection. The range consists of MDC compact residual current circuit breakers with overload protection (RCBO) and IDP residual current circuit breaker (RCCB).

MODULAR ACCESSORIES

The 90 AM range, in addition to auxiliaries common for the all circuit breakers, comprises many modular accessories for the protection, command, programming, measurement and signalling in electrical systems.

90 ReStart

Automatic reclosing devices

In the event the circuit breaker trips, the ReStart devices, after checking the system status, restore the power supply thereby ensuring maximum continuity of service in complete safety. Available for both residual current circuit breakers and residual current circuit breakers with overcurrent protection, the range is characterized by the Autotest functions, with periodic and automatic control of the residual current protection without interrupting the power supply and PRO with extended control of the system.

GW90902N	40 A	30 mA	A[IR]	230 V	5	1/4
GW90913	63 A	30 mA	A[IR]	230 V	5	1/4

CHARACTERISTICS: after RCCB has tripped, ReStart checks the insulation prior to the automatic reclosure. In the event of a fault (earth leakage), ReStart will not reset the circuit breaker but will continue to monitor the circuit every 2 minutes reclosing the circuit breaker when safe to do so. In the meantime the integrated configurable auxiliary contact will change state to indicate that the automatic reset did not take place.

Compatible with:

-GWD0992 ModBus RS485 interface module.

NOTE: the Autotest function automatically and periodically (every 28 days) tests the RCCB, without interrupting the electric power supply, thus maintaining the performance of the residual current protection over time.

230 V ac power supply, phase-neutral.

RCCB's type Impulse Resistant presents greater resistance to untimely tripping in comparison to standard residual current circuit breakers. Immunity level 8/20µs: 3000A for IR type, 250A for standard type.

AN ALWAYS-PROTECTED SYSTEM

Thanks to the GEWISS patented automatic self-test function with no power interruption, the ReStart Autotest ensures maximum protection efficiency and removes the need for the user to manually perform periodic RCCB relay trip tests.

ALL UNDER CONTROL

The LEDs on the faceplate of the device provide information on the operating status of the system. At a glance, you can tell if the system is working properly, if the Autotest is in progress, or if there is a fault.

CONTINUOUS MONITORING GUARANTEED

After a failure, the ReStart PRO performs a continuous system check until safety is re-established and then recloses the protection circuit breaker. The auxiliary contact also allows remote monitoring of the system status information.

REDUCED FOOTPRINT

The compact MCB protect 2 poles per module, reducing space by up to 50%. This also allows installation of smaller enclosures, for savings on costs.

MAXIMUM SECURITY

To ensure the most secure fastening and protection from possible contact with live parts, the terminals are equipped with a protective, sliding insulating insert. In addition, the double DIN hook provides a more stable fastening and facilitates maintenance operations.

SIMPLIFIED ACCESSORY MANAGEMENT

The 90 MCB range of circuit breakers integrate seamlessly with the 90 range of electrical auxiliaries, providing simplified and streamlined accessory management.

A CIRCUIT BREAKER FOR EVERY NEED

The 90 RCD range meets all the protection requirements against earth leakage in electrical systems with different types of current, from AC type to A type.

SERVING CONTINUITY

The 90 RCD range also includes IR Reinforced Immunity versions, which are characterised by high resistance to untimely tripping caused by power surges. These versions are particularly suitable in systems where continuity of service is essential.

MAXIMUM PROTECTION IN MINIMUM SPACE

The use of MDC compact residual current circuit breakers reduces the number of modules installed, allowing the installation of smaller, and therefore less costly, enclosures.

INTELLIGENT LOAD MANAGEMENT

P-COMFORT prevents the interruption of electrical power: in the event of an overload, it only disconnects non-preferred loads, and then automatically reactivates them after a predefined time, thus eliminating any inconvenience due to blackout.

SIMPLIFIED ACCESSORY MANAGEMENT

Auxiliary contacts and trip coils, common to all circuit breakers, guarantee simplicity, interchangeability, multiple uses and rationalisation of the items.

OVERVOLTAGE UNDER CONTROL

The LST surge protection device range offers maximum protection against intense atmospheric discharges caused by direct and indirect lightning. The easy-to-extract cartridges makes it quicker and more convenient to replace used cartridges.

EGO INTERNATIONAL plates

With their clean, compact lines, EGO plates make the right impression. Modern shapes with slightly curved surfaces that taper towards the edges convey balance and simplicity. The opalescent profiles inside the plate, in aesthetic continuity with the EGO SMART versions, add a subtle element of unique identity. Every detail is designed to ensure appeal and personality.

INNOVATIVE

ChoruSmart offers the best technologies for an aesthetic and functional experience suitable for every person. In particular, the new EVO axial and touch controls offer the ability to centralize the management of lights and shutters with an extremely simplified installation.

AESTHETIC VARIABILITY

The wide range of options for customising the devices, in terms of colour and modularity, ensures a vast choice of solutions. Six colourways are available: three with a satin finish and three with a glossy finish, for a perfect match between the devices and the plate.

SCALABLE

ChoruSmart began as a traditional domestic series, but with the addition of a few Connected Smart Home or Home&Building Pro elements, it can become smart and suitable for both renovations and new buildings. The combination of colours, materials, finishes and shapes offers something for every taste and need.

ChoruSmart

Satin white modular devices

The CHORUSMART modular devices make it possible to create infinite combination between devices and plates, thanks to a complete range that is able to satisfy all design, functional and installation requirements. Colours and finishes: satin white, distinctive and elegant.

Unlimited functions in reduced spaces: the ChoruSmart range consists of rocker button keys with 1/2, 1 and 2 modules, to optimise space as needed, and axial keys in EVO or SMART version, to satisfy even the most modern needs. Front coupling: the front coupling makes the component assembly and release operations simple and quick, enabling these to be completed without removing the support, unique for all the plates and fruits.

INNOVATIVE

ChoruSmart offers the best technologies for an aesthetic and functional experience suitable for every person. In particular, the new EVO axial and touch controls offer the ability to centralize the management of lights and shutters with an extremely simplified installation.

AESTHETIC VARIABILITY

The wide range of options for customising the devices, in terms of colour and modularity, ensures a vast choice of solutions. Six colourways are available: three with a satin finish and three with a glossy finish, for a perfect match between the devices and the plate.

SCALABLE

ChoruSmart began as a traditional domestic series, but with the addition of a few Connected Smart Home or Home&Building Pro elements, it can become smart and suitable for both renovations and new buildings. The combination of colours, materials, finishes and shapes offers something for every taste and need.

ChoruSmart

Satin natural beige modular devices

The ChoruSmart modular devices make it possible to create infinite combination between devices and plates, thanks to a complete range that is able to satisfy all design, functional and installation requirements. Colors and finishes: natural satin beige, warm and enveloping. Unlimited functions in reduced spaces: the ChoruSmart range consists of rocker button keys with ½, 1 and 2 modules, to optimise space as needed, and axial keys in EVO or SMART version, to satisfy even the most modern needs. Front coupling: the front coupling makes the component assembly and release operations simple and quick, enabling these to be completed without removing the support, unique for all the plates and fruits.

INNOVATIVE

ChoruSmart offers the best technologies for an aesthetic and functional experience suitable for every person. In particular, the new EVO axial and touch controls offer the ability to centralize the management of lights and shutters with an extremely simplified installation.

AESTHETIC VARIABILITY

The wide range of options for customising the devices, in terms of colour and modularity, ensures a vast choice of solutions. Six colourways are available: three with a satin finish and three with a glossy finish, for a perfect match between the devices and the plate.

SCALABLE

ChoruSmart began as a traditional domestic series, but with the addition of a few Connected Smart Home or Home&Building Pro elements, it can become smart and suitable for both renovations and new buildings. The combination of colours, materials, finishes and shapes offers something for every taste and need.

ChoruSmart

Glossy titanium modular devices

The ChoruSmart modular devices make it possible to create infinite combination between devices and plates, thanks to a complete range that is able to satisfy all design, functional and installation requirements. Colors and finishes: glossy painted titanium, innovative and trendy.

Unlimited functions in reduced spaces: the ChoruSmart range consists of rocker button keys with 1/2, 1 and 2 modules, to optimise space as needed, and axial keys in EVO or SMART version, to satisfy even the most modern needs. Front coupling: the front coupling makes the component assembly and release operations simple and quick, enabling these to be completed without removing the support, unique for all the plates and fruits.

EASY CHARGING WITH ONE-HAND SYSTEM

Vandal-proof socket with shutter and without cover, designed to facilitate the start of charging with the one-hand system

LED LIGHTING

The socket is also available in versions with an INTERMITTENT LED lighting system, to facilitate cable insertion, or RGB LED, to highlight the socket status indicator.

THE FUTURE OF CHARGING IS GREEN

Socket and plug are made partially of Renycle®, a range of specialty technopolymers, obtained from recovered nylon, with much lower environmental impact than virgin material, calculated for each formulation through LCA. As a result, it is ideal for projects where sustainability is a key requirement.

68 Q-MC

Terminal system for energy distribution and service in insulating material

The 68 Q-MC range is an innovative energy and services distribution system made of thermoplastic, for environments such as tourist ports, campsites and public spaces (trade fairs, markets, gardens, etc.). It combines an attractive design with complete reliability over time, thanks to its resistance to chemical and atmospheric agents. The range includes both pre-wired and unwired versions, which can be configured as needed, and is available in light blue and white.

A WORLD OF APPLICATIONS

The 68 Q-MC series of distribution terminals are available in both thermoplastic and stainless steel versions, energy distribution solutions in ports, campsites, parking areas, parks and gardens.

SIMPLE AND INTELLIGENT MANAGEMENT

The electronically managed terminals allow real-time recording and monitoring of consumption. The user interface display and credit management transponder key reader are housed in the head.

Effective Packaging for Optimal Distribution and Protection

Different types of packaging ensure optimal handling in distribution facilities. Each package provides necessary information for correct use and identification, with important features graphically highlighted. The EAN 13 barcode facilitates stock management. Packaging types include carton, blister, and shrink film.

Outer Box: Durable and versatile, ideal for transport and storage. Offers large printing surfaces for information, ensuring easy identification and handling.

Blister: Suitable for small and medium-sized products. Uses enveloping plastic film to hermetically seal contents, preserving integrity and safety. Transparent material allows product visualisation, with printed information for clear communication.

Shrink Film: Ideal for grouping multiple units in one compact package. Shrinks and adheres tightly when heated, protecting against dust and moisture. Useful for shop displays, allowing visibility and simplified handling. Each packaging type meets specific protection, visibility, and handling needs, ensuring products reach consumers in optimal condition.

- 2.1 The General Conditions apply to all sales made between Gewiss and the Purchaser whose subject matter is the Products and form an integral part of all Contracts entered into between the Parties, regulating their relationship, even where not expressly referred to. These General Conditions replace Gewiss' previous general sales conditions.
- 2.2 The Purchaser cannot demand or take exception to conditions other than those contained in the General Conditions. Therefore, any conditions set out in writing by the Purchaser on the Order shall not be valid, or those in any other phase of the contractual negotiations as well as after the acceptance or knowledge of the General Conditions, as well as any general purchasing conditions of the Purchaser. To this end, the performance, even partial, of the Order by Gewiss or fulfilment of any other obligation in terms of the Purchaser are not valid and cannot be interpreted as tacit or implicit acceptance of any general condition which has not been explicitly signed by Gewiss.
- 2.3 The General Conditions are only valid for contractual relationships between Gewiss and professional operators, thus the Italian Legislative Decree no. 206 of 6th September 2005 (Consumer Law) is not applicable. Up to the time of finalising of the Contract under the above conditions, offers and/or estimates made by Gewiss or its agents, representatives and assistants, shall not be binding for Gewiss.
- 3.4 In the event that the Order confirmation differs from the Order, for example but not limited to, the quantity of Products, prices, discounts and delivery terms, such Order confirmation shall be considered as a counterproposal

The Purchaser shall not have the right to refuse the delivery of the Products.
- 5.4 If, once the Products are ready for shipping to the Purchaser, and delivery is not made due to circumstances not attributable to Gewiss or due to force majeure, the delivery shall be considered performed for all extents and purposes with a simple notice of goods ready for picking-up to be notified to the Purchaser by registered letter, fax or e-mail.
